## 2008 Award Show

### LIGHTEVENT again technical service provider at 1LIVE Krone Show in Bochum

The 1LIVE Krone 2008, Germany's biggest radio award, was granted on 4 December in Bochum and broadcast live on TV and radio.

A first rate show with excellent live acts - Mia, Peter Fox, Polarkreis 18 and Clueso amongst others - turned the pre-Christmas holiday spirit into a big party. The event was supported by the Cologne based event technology specialists LIGHTEVENT.

The LIGHTEVENT team assured once more a smooth running of the show. Gregor Gäb of the WDR created the lighting design of this mega event; LIGHTEVENT provided the complete rigging and lighting of the show. This was done with over 250 moving lights, 800 meters truss and 90 motors. Providing and coordinating the technology for 4 locations inside the Jahrhunderthalle was a challenging task for the team.

The talk and performance stage played an essential role in the setup. Amongst others, a tandem projection with two DLP projectors equipped with 16,000 lumens each was used here. Furthermore, the rental stage, the audience area as well as the show stage had to be coordinated. On the latter, a media controlled 60-element "G-LEC Phantom 30" set the framework. For the lighting of the stage LIGHTEVENT used the floodlights "VaryLED A7 Zoom" by JB Lighting.
